- Bottom inner load rated gussets.
- Ideal for Telecommunications, Broadcasting, Commercial, Testing, Educational.
- Manufactured to EIA Standards

General Description

The EXL Series rack enclosures are offered in four heights and two different depths. They accommodate 19" wide rack equipment. Total rack width is 22-1/4" OD. Standard rack depths are 24-1/2" and 30".

All Models are constructed from 16 gauge & 14 gauge CRS They have a removable rear door with quick spring loaded inner hinge pins. The door can be mounted for either left or right hand swing.

The EXL series racks have plenty of inner wire management to meet all your needs. Stamped vertical slotted vent patterns are located on the sides, on both the top and bottom. Additional venting is located on the front, both top and bottom.

The racks come with a standard opening on the top, that can accommodate one of four configurable optional top plates. (See chart)

There are plenty of electrical conduit knockouts throughout. Eight 1/2" & 3/4" double knockouts are located on the back. Three 1" & 1-1/2" double knockouts are located on the top rear.

Racks come standard with front mounted 11 gauge steel rack rail with tapped 10-32 EIA spaced holes
