- 400 Lbs capacity

### General Description

The KD Series rack enclosure accommodates 19" wide rack equipment. Total rack width is 19-1/4". Overall depth is 20". Maximum height is 78-3/4". Maximum usable rack height is 75-1/4". Maximum rail to rail depth is 20".

All Models are constructed from 14 gauge CRS. The KD Rack Kit comes with a top and bottom panel, 2 side braces, 4 filler panels, and 4 rack rail sections cut to desired length. The KD Racks comes complete with all hardware and ready to assemble. There is an optional 3" caster kit and split rear rail kit available.

The KD Series Rack was designed for an economical means to rack audio equipment, but not have to give up strength features. This rack can handle up to 400 lbs of gear.

Racks come standard with 11 gauge steel rack rail with tapped 10-32 EIA spaced holes.

When ordering, please indicate overall height required. Usable rack space will be 2 rack spaces (3-1/2") less than overall height.

Sample part number - KD45 - 45 space (78-3/4") overall height
