

## POR Series Pull Out Sliding Rack

The POR Series Pull Out Rack slides out a full 18" to provide access to gear with shallow depths. This unit slides in and out on either a two slide (150 LB Capacity) or a four slide (300 LB Capacity) system. The rack locks closed with included hardware. Units can be purchased in any size height up to 21 space (36.75") A pair of eight space rack rails is mounted in the rear, and whatever size needed for the front is included. The unit is 19" deep.

POR Minimum Cabinet Dimensions - 19-1/8" Wide - 19-1/8" Depth - By Rack Height + 1-3/4"

This rack system can be custom ordered in any size rack height, and can also be custom fabricated to any width. **Rackman recommends not exceeding 21 spaces on vertical height with this system.**

POR194-10 Shown partially extended.

POR194-10 Mounted in sample Cabinet

Part #	Description	Weight Capacity	Rack Space	Overall Unit Height	Overall Depth
POR192-10	2 Slide System	150 lbs	10 Space - 17-1/2"	19-1/4"	19"
POR194-10	4 Slide System	150 lbs	10 Space - 17-1/2"	19-1/4"	19"
POR192-21	2 Slide System	300 lbs	21 Space - 36-3/4"	38-1/2"	19"
POR194-21	4 Slide System	300 lbs	21 Space - 36-3/4"	38-1/2"	19"

**The POR Series system uses full ball bearing slides for easy pull out. Maximum equipment depth is 18" deep.**

**Dash numbers represents the rack height required. Overall height of unit will be 1-3/4" taller. Specify rack height or overall height when ordering.**
